RE: Forest Practices Board Complaint – File 090888 / Kotcho Silviculture

Dear Mr. Williams:

Canada Resurgence Development Ltd. and Timber Baron Contracting Ltd. would like to give the Gitanyow an update on some of the silviculture activities that have occurred in the Kotcho this past 2011 field season.

The final report from the Forest Practices Board regarding the Gitanyow complaint found three blocks to be of a concern within the Kotcho operating area. The three CP Blocks 53-1, 55-1 and 91-3 were all surveyed this 2011 field season. The surveys were completed by an independent reputable forest company. All three blocks have gone from a non-sufficiently restocked NSR status (based on 2004/2007 surveys) to sufficiently restocked SR or free growing FG status.

In the next couple of months when all the survey reports have been submitted we will update the Gitanyow again on the status of the blocks which were surveyed on the old Buffalo Head forest license area and also the silviculture status of CRD's more current blocks located in the Madely operating area.

Regards,

Rina Gemeinhardt
Forestry Manager
